

Update from your Gardening Committee!

We are pleased to tell you that we now have an herb garden in the South Garden! A variety of herbs have been planted and should be mature for picking later in the summer. Basil, rosemary, thyme, mint, chives, oregano are just a few of the wonderful fresh herbs that will be available to residents this summer. At present, they are not staked to identify them, but this will happen so stay tuned for further updates on how to clip them as well as pictures. Fresh herbs add so much flavor to cooking, and we will be able to pick our own soon!
